# MULTI-PROCESS TUBULAR FURNACE

This multi-process tubular furnace delivers unrivalled levels of performance (homogeneity <±5°C over a large useful volume).

Its technology and wide range of functions provide **unbeatable heat treatment quality** with process adaptability to meet your most demanding requirements.

#### **ABOUT US**

AET Technologies specialises in the design and manufacture of electric furnaces for research and industrial laboratories.

The expertise we've built up over the years makes us the ideal partner to meet your needs.

Thanks to this know-how, AET Technologies works with the biggest names today and in the future.

David D'ATTOMA Chief Sales Officer

### A modular tubular furnace

A multi-process single or multi-chamber furnace up to 1250°C (1600°C on request), ideal for brazing, degassing, glass/metal sealing, polymerisation, pyrolysis, annealing and other applications.

# A high-performance control system

Our system provides: fast, accurate response, temperature stability (±1°C), fewer errors and optimised energy consumption. It contributes to the improvement of your products.

# Customised HMI supervision

The AET Technologies supervision software includes all the essential supervision functions: curve plotting, history, alarms, file exchange, data recording, etc.

### **MULTI PROCESS TUBULAR FURNACE**

#### **SINGLE OR MULTI-CHAMBER**

An ideal technical solution for brazing, degassing, glass/metal sealing, polymerisation, pyrolysis, annealing and other applications.

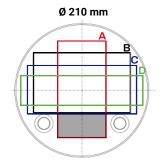

After-sales service

Recognition of excellence

#### **Keys elements**

- Max temperature: 1250°C (up to 1600°C)\*
- Temperature control on furnace or load
- Sealed furnace: controlled atmosphere
- Cleanroom compliant: ISO 7
- Thermal homogeneity <±5°C
- Homogeneous zone length: 500 1000 mm
- Laboratory tube: metal, quartz, SiC (ceramic)\*
- Laboratory tube size: 210 270 320 mm (other Ø)\*
- Process atmosphere: oxidising gas, neutral gas (reducing gases, hydrogenated gas 6% max)\* Leak rate: 1 10<sup>-8</sup>mbar.l/s
- Manual loading: up to 10kg (weight over than 10kg)\*
- Excellent ergonomics of the loading area
- HMI supervision: operation, traceability, data analysis
